

SFS PLASTICS MILK 3 FEEDER

Product Details

The SFS Plastics Milk 3 Feeder is manufactured from heavy duty polyethylene and is designed as a milk delivery system for feeding 3 calves at a time.

The separate compartments in the feeder decrease the risk of cross-contamination from one calf to the other.

The feeder is fitted with 3 pull through Peach Teats and each compartment holds approximately 2.5 litres of milk. Plastic brackets allow secure fastening to gate or rails.

Also easily cleaned to increase hygiene and ensure your calves get the best start possible.
